EXPERIENCE

Software Engineer II - Here Technologies

March 2024 – Present Mumbai, Maharashtra,India

- Working on full-stack web project in Angular 18, SQL and Web API in .NET 8 integrated with Amazon Web Services (AWS) while using GitLab for Version control.
- Used JIRA for project management and delivered solutions within deadlines

Software Engineer - GEP Worldwide

June 2021 - Nov 2023 Navi Mumbai, Maharashtra,India

- Worked in "Elastic Search" team a critical platform team at a core level in the organisation.
- Worked as a Full-Stack Developer in multiple technologies such as .Net, C#, Web API, Rest API for backend development of REST APIs, Angular, HTML, CSS, Low-code for frontend development, Elasticsearch (ELK Stack) for data storage.
- Used tools like GitHub for version control, JIRA for project management, Confluence for project documentation and guidance, Azure CI/CD for deployment of applications.
- Performed end to end Unit Testing of backend and frontend applications and maintain 100% code coverage.
- Developed utilities in Python/ C# to speed up daily work.
- Guided up to 50+ application teams worldwide in multiple time zones, integrating their application with Elasticsearch for new clients up till production.
- Helped teams in data manipulation and troubleshooting issues related to data ingestion and data retrieval in Elasticsearch.
- Collaborated with 20+ clients and UX team and delivered solutions on time.

ACHIEVEMENTS

- Lead a team of designers as HOD of Creatives Team in college fest
- Secured 1st position inter-college competition during Engineering
- Secured 2nd position in coding contest in Coding competition in Diploma while competing with multiple seniors

TECHNICAL SKILLS

- Back-end Development: Python, C#, C++, REST APIs, Web API, .NET (6+), .NET Core (6+)
- Front-end Development: Angular (12+), HTML, CSS, JavaScript, Typescript
- Database: Elasticsearch (NoSQL), Kibana, Kafka, MongoDB (NoSQL), Logstash
- Cloud: Azure Cloud, AWS, GCP, Azure Blob Storage
- Version Control: GitHub, Gitlab
- Other: JIRA, SDLC, CI/CD, Problem Solving, Analytical Skills, Debugging, Troubleshooting, Unit, Testing, Performance Tuning

EDUCATION

Xavier Institute of Engineering

B.E. (Computer Engineering) - 7.45 CGPA

August 2018 – June 2021

Thakur Polytechnic

Diploma in Information Technology - 77.82%

2015 to 2018

Children's Academy

Secondary - 86.33 % I.C.S.E.

2015

PROJECTS

Webtool in Angular

- Basic webtool comprising of .NET 8 and SQL for backend and Angular for front end.

Enterprise Search Engine

- REST API developed in .NET and integrated with Elasticsearch on Azure cloud .

Global search

- A full-stack project used for retrieval of data from Elasticsearch for all the configured projects, with REST API for Backend developed in .NET 6.0 involving parallel processing and Frontend developed in **Angular 8**.

Index template management API

- RESTful Web API built in **.NET Core** for deploying and updating Index templates in **Elasticsearch**.

Index Conversion Utility

- Utility developed in **Python** to convert indices and migrate data. Used **http requests** and **file management**.

CERTIFICATIONS

- AWS Cloud Certified Practitioner
- Infrastructure and Application Modernization with Google Cloud
- Digital Transformation with Google Cloud
- Innovating with Data and Google Cloud
